Speed Check Weigher

Product Description

The **Detectronic Speed Check Weigher** allows you to control the correct quantity in pre-packaged products, ensuring the quality and legality of your products.
The Detectronic series of automatic speed check weighers provides total control, giving the certainty of compliance of each lot and every single package.

Detectronic Speed Check Weigher can be integrated with Metal Detection systems for the detection of contaminants.

The ability to connect the **Speed Check Weigher** in a simple complete and reliable Ethernet network allows you to control and centralize the processes efficiently.

Features
- High speed and accuracy
- Robust and reliable mechanical structure
- Available as multi check solution with metal detector/x-ray
- Easy cleaning and low maintenance
- Easy to integrate in existing lines
- Low cost of ownership
- Color touch screen 10.4" display
- Easy integration of reports in pdf/csv files
- Function feedback for the adjustment of the upstream filling line
- Possibility of connection to a label printer for the total print out
- Easy product change
- Functional and easy interface menu

Detectronic the effective alternative
- detecting the future.

| TECHNICAL DATA	
Performance	
Capacity	1200 g div. 0,2 g 3000 g div. 0,5 g
Memory	2 Gbyte – USB optional
Display	Touch screen - LCD Color 10.4"
Interfaces	Ethernet TCP/IP 10/100Mb WI-FI (optional)
Production rate	Up to 250 pieces per minute This rate depends on the size and weight of the packs
Interface connection	
• Ethernet connection with TCP/IP protocol. RJ connector	
• Programmable I/O	
Functions	
Mains Voltage	115V/-230 Vac – 50/60 Hz, 1000VA max
Operating Temp.	+ 5 C/ + 40 C
Humidity	From 20 to 85% non-condensing
Compressed air	From 400 to 600 kPa
Structural Features	
Length / Height	Upon specification
Product Conveyors	
Height / Width	Upon specification
Protection degree	IP54 (Optional IP65)

A comprehensive list of options are available.
